## **Cover Letter**

I am a motivated third-year Computer Science student at the Namibian University of Science and Technology, currently majoring in Software Development. I am writing to express my interest in a Work Integrated Learning or internship opportunity where I can apply my technical knowledge while gaining practical industry experience.

Through my studies and personal projects, I have developed a solid foundation in Java programming, SQL database development, and web technologies such as HTML, CSS, JavaScript, PHP and React. I have built and deployed my own portfolio website and actively use GitHub to manage and showcase my projects. These experiences have strengthened my problem-solving skills and reinforced my passion for building functional, user-focused solutions.

I am highly motivated, eager to learn, and comfortable working both independently and as part of a team. I take pride in being reliable, adaptable, and willing to take on challenges that contribute to both personal growth and organizational success.

I would welcome the opportunity to contribute my skills while learning from experienced professionals in a real-world environment. Thank you for considering my application. I look forward to the possibility of discussing how I can add value to your organization.

Kind regards,

**Quinton ǀKhuwiseb**

## About me

I am a motivated third-year Computer Science student at the Namibian University of Science and Technology, with a strong interest in software development and data analysis. I have hands-on experience with Java, Python, SQL, and web technologies, and I enjoy building practical projects that solve real problems. I am eager to apply my technical skills in a professional environment while continuing to learn and grow.

## Skills

- Java (OOP, basic data structures)
- SQL (CRUD operations, database design)  
Git & GitHub
- HTML, CSS, JavaScript, PHP, React
- Python (Pandas, basic data analysis and manipulation)

## Experience

Loop Technologies - Software Development Intern

- Gained experience on full stack React environment and writing technical proposals

Duration: 05 May 2026 - 07 August 2026

Reference: Senior Developer Matheus Mulundu

Contact: +264 81 435 9760

## Projects

### **Personal Portfolio Website**

- Built and deployed a responsive portfolio using HTML, CSS, and JavaScript to showcase projects and skills via GitHub Pages.

### **Anime Blog Platform (Ongoing)**

- Developed a full-stack anime blog using HTML, CSS, JavaScript, and PHP with image uploads, categorized posts, featured/trending content, and dynamic category management.

**RE: Letter to Employer on behalf of Mr QUINTON KHUWISEB (student no: 224031503)**

Dear Sir/ Madam

The Faculty of Computing and Informatics at the Namibia University of Science and Technology (NUST) is offering a Degree in Computer Science specializing in Software Development. The Degree was designed in close cooperation with the local industry. One of the key components of these courses is practical in-service training (hereafter called "**Work Integrated Learning**").

Please allow me to elaborate a little on our **Work Integrated Learning** program:

The work integrated learning component is scheduled for the final semester where the student will spend 12 weeks in the industry. One of the requirements is that students pass all 2nd-year subjects. Therefore, we assume that all students qualifying for work integrated learning have a sound theoretical foundation. The primary purpose of the student's work integrated learning semester is to provide the student with the opportunity to obtain hands-on practical experience in his/her relevant field of study. For this reason, it is imperative that the employer subject the student to meaningful and stimulating activities that are related to the student's field of study; e.g. minor software design and implementation projects, elementary research, administrative work, participation in related projects, etc. Work accomplished by the student must prove meaningful and beneficial to the employer. This aspect of the student's practical training will play a major role in his/her final assessment by NUST.

During the work integrated learning, the department will continue to support and supervise the student. For each student, there will be one staff member appointed for supervision. This staff member together with the supervisor of the hosting institution will evaluate the work of the student.

This letter also serves to bring to your attention the continuous need for positions in Industry where the above-mentioned students can be placed to perform their **work integrated learning**. Whilst we academic staff and students at NUST firmly believe that the studies offered are meaningful and relevant to the requirements of the country, we would like to think that we can count on your valued support, not only in providing bursaries but also in giving employment opportunities for students doing their **work integrated learning**. This will make a valuable contribution towards the development of the graduate who eventually approaches you for employment.

May I request that you mandate the decision makers in your organization who are involved with the recruitment and employment of technical personnel to proceed with the necessary steps to support students in this regard. Thank you for your co-operation.

Yours sincerely

Dr Gereon Koch Kapuire
